FOR IMMEDIATE RELEASE

Ohio company awarded four year contract with the State of Ohio for energy services

Akron, Ohio March 12, 2005 Think Energy Management LLC is pleased to announce that it has been awarded a four year State Term Schedule (STS) contract for 'energy services' with the State of Ohio (Dept. of Administrative Services / State Office of Purchasing). State and local government agencies can find contract # 779874A on the Ohio State D.A.S.'s website www.das.ohio.gov/.

Think Energy Management LLC's President, Richard G. Lubinski had this to say: *"We are pleased to be awarded an Ohio STS contract for energy consulting services. This contract makes energy services available to Ohio State agencies and its political sub divisions who elect to use the State Term Schedule contracts. Ohio's STS contracts provide State agencies and local governments with high quality goods and services based on pre-negotiated prices, terms and conditions."* The State of Ohio does not endorse any particular products or services.

This contract is similar to Think Energy Management LLC's five year contract with the Federal General Services Administration (GSA) / Federal Supply Schedule (FSS) contract for energy services awarded in 2004. This was the first GSA Schedule Contract for energy services awarded to an Ohio firm. Federal agencies can find contract # GS-10F-0599P on GSA's website www.gsaadvantage.gov

In TEM is speaking on energy management this week at the National Facilities Management & Technology Conference in Baltimore and in April at the Ohio Charter School Association's Annual Conference in Columbus.

.....

Think Energy Management LLC (TEM) is an independent energy consulting company providing energy cost savings since 1981. TEM provides both Supply-Side and Demand-Side energy management services to clients in 28 states. TEM's website, www.think-energy.net provides useful information on energy efficiency tips, Federal and State energy programs, energy efficiency rebate programs, maps showing deregulated electricity and natural gas markets and Ohio's electricity and natural gas costs. TEM is a member in the Association of Energy Engineers and the US government's *EnergyStar* and *Rebuild America* energy programs.

Its staff has national professional certifications including: Certified Energy Manager (CEM), Certified Demand Side Management Professional (CDSM), Certified Energy Management Systems Contractor (CEMSC), Business Energy Professional (BEP) and U.S. EPA Green Lights Survey Ally (lighting auditor)

Additional information about customized energy management opportunities can be obtained by calling Richard G. Lubinski at (330) 283-4604 or by sending an email to rick@think-energy.net
